MISSION

Montana Tech of The University of Montana Nursing Department is dedicated to preparing generalist nurses by exposing them to a diverse array of nursing roles through a variety of community settings.

The nursing department stresses the importance of being an intellectual leader and role model in the profession of nursing.

PHILOSOPHY

We believe:

Nursing and nursing education are essential for the promotion, maintenance and restoration of health, along with the prevention of illness.

Nursing and nursing education will become more complex as health care evolves. This continually changing health care environment mandates the role, function and educational preparation of the nurse.

The profession of nursing is best served through highly educated members who continually strive to broaden their knowledge and expertise to meet the increasing demands of the health care environment.

In a holistic approach to nursing education, including sensitivity to the physical, psychological, spiritual and sociocultural needs of the individual, family and community.

Acquisition of nursing knowledge and skill is best achieved through a combination of classroom requirements and clinical experience in both simulated and actual care environments.

In a continually evolving curriculum that reflects best practice.
CORE CONCEPTS OF CONCEPTUAL FRAMEWORK

The following concepts are considered to be the foundation for the nursing program’s conceptual framework and will be threaded throughout the BSN curricula.

Caring

Caring is a human response to needs that is articulated through commitment, knowledge, experience, and therapeutic use of self. Caring occurs when the nurse/client interaction transcends physical care and reflects respect for the client and his or her unique circumstances and health beliefs.

Communication

Communication is an interactive process that involves the nurse, the client, and health care team members. Communication consists of both verbal and non-verbal and electronic exchanges that encourage the expression of needs, support coping behaviors, and facilitate decision making.

Professionalism

Professionalism is a set of behaviors that all nurses are expected to exhibit as members of the nursing profession. These behaviors foster the nurse-client relationship while supporting the integrity of the profession. Expected behaviors include, but are not limited to, unconditional positive regard, efficiency, responsibility, accountability, fairness, trustworthiness, honesty, confidence, and competence.

Critical Thinking

Critical thinking is an active, purposeful reasoning process that is used to continually modify and improve individual nursing practice. It involves ongoing reflective analysis of data accumulated through assessment, planning, implementation, and evaluation of nurse/client interactions.

Clinical Judgment

Clinical judgment is an autonomous problem-solving process that is derived through evidence based inquiry, critical thinking, and decision making, while responding to clients as unique individuals who have the right to self-determination.
Montana Tech Nursing Department

Responsibility to the Client

Manager of Care
- Supervise nursing personnel and support staff
- Design, manage, and evaluate comprehensive plans of nursing care

Provider of Care
- Prepared to deliver care to clients in all care settings
- Prepared to care for the needs of whole communities and populations

Member of the Profession of Nursing
- Academic preparation in community aspects of practice
- Inquiry-based practice
- Management of resources

Specialized knowledge of science
- Independent nursing practice
- Collaboration with other care providers
- Diagnose and treat human response needs
- Core of clients with unpredictable outcomes
- Utilize evidence-based nursing in the care of clients
- Direct accountability to the client

Coordination of client care
- Supervised nursing practice
- Standardized nursing procedures
- Basic knowledge of sciences

Critical Thinking
- Communication
- Professionalism
- Clinical Judgment
- Caring

Responsibility to Nursing

Nursing Department uses the key concepts of Caring, Communication, Professionalism, Critical Thinking, and Clinical Judgment to prepare its graduates to be

Reviewed August 2017
PROFESSIONAL NURSING STANDARDS AND GUIDELINES

Program Description

The focus of Montana Tech’s professional nursing curriculum is to provide education leading to substantial specialized knowledge of the biological, physical, behavioral, psychological, and sociological sciences and of nursing theory as a basis for the nursing process. The nursing process is the assessment, nursing diagnosis, planning, nursing intervention, and evaluation in the promotion and maintenance of health; the prevention, case finding, and management of illness, injury, or infirmity; and the restoration of optimum function. The term also includes administration, teaching, counseling, supervision, delegation, and evaluation of nursing practice. The professional nurse is directly accountable and responsible to the consumer for the quality of nursing care rendered.

The role of the registered nurse is to provide nursing care to clients—individuals or groups. The nursing curriculum prepares the graduate to function in the three recognized roles of the professional nurse—provider of care, manager of care and member of the discipline of nursing.

- As a provider of care, the registered nurse demonstrates critical thinking, accountability, clinical decision-making through use of the nursing process, effective communication with clients, families and health team members, teaching and collaboration with the client and family, collaboration with members of the health care team, and sensitivity to individual and cultural diversity.

- As a manager of care, the registered nurse demonstrates management of care for a group of clients using collaboration and consultation, organizes and delegates nursing care, client advocacy, and evaluation of health care delivery using client-centered outcomes.

- As a member of the discipline of nursing the registered nurse demonstrates knowledge of self-assessment and development and continuous learning, ethical-legal framework for nursing practice, advancement of nursing practice through professional activities, political, economic and societal forces affecting nursing practice and health care delivery, and health care change and nursing research.
Montana Tech Nursing Department

**Program Goals**

1. Prepare individuals for practices as baccalaureate prepared nurses.
2. Recruit and retain a qualified and engaged faculty.
3. Provide an environment that supports student’s success and promotes innovation and excellence in instruction.
4. Contribute to the improvement of healthcare in our local and regional communities.

**BSN Program Outcomes**

Montana Tech’s Bachelor of Science in Nursing Program curriculum provides additional education that will prepare the graduate to:

1. Provide nursing care to individuals, families, and communities by utilizing interprofessional communication, collaboration, and a holistic framework.

2. Design, manage, and evaluate comprehensive plans of nursing care in a variety of structured and unstructured settings including vulnerable populations.

3. Function as a leader, change agent, and resource manager in the healthcare system to promote patient safety by utilizing information technology.

4. Critically appraise current research to promote understanding of the production of knowledge and application of evidence-based nursing practice.

5. Actualize a commitment to professional accountability and ethical standards in practice.

**BSN Individual Student Learning Outcomes**

1. Apply and integrate theories and concepts from the sciences, arts, and humanities into nursing practice.

2. Demonstrate knowledge of healthcare organizations and the leadership role that nurses must possess to ensure quality care and patient safety.

3. Use theory, research, and evidenced-based practice models in the delivery of nursing care and in the promotion of health and well-being to individuals, families, and communities.

4. Demonstrate competency in the clinical area by using patient care technologies and information management systems to deliver safe and effective care.
Montana Tech Nursing Department

5. Integrate knowledge of healthcare policy, finance, and regulatory environments into professional nursing practice and the healthcare system.

6. Demonstrate effective interprofessional communication and collaboration with a multidisciplinary healthcare team to improve patient outcomes.

7. Provide nursing interventions that focus on disease prevention and health promotion to individuals, families, communities, and to diverse populations.

8. Demonstrate professional accountability and ethical responsibility in the delivery of nursing care.

9. Deliver holistic, generalist nursing care to patients across the lifespan and through the healthcare continuum that reflects compassionate, patient-centered care and results in high quality patient outcomes.

II. ACADEMIC POLICIES, REQUIREMENTS, AND INFORMATION

ACADEMIC DISHONESTY:

Academic Honesty
Montana Tech believes that academic honesty and integrity are fundamental to higher education. Montana Tech has a responsibility to promote academic honesty, integrity, and the highest ethical and professional standards and behavior in and out of the classroom. Accordingly, policies and procedures have been developed to address instances of academic dishonesty. Students who violate these standards commit academic misconduct and will be subject to academic and/or disciplinary sanctions.

Academic Dishonesty
Academic dishonesty includes cheating; plagiarism; forgery; falsification; facilitation or aiding academic dishonesty; multiple submission; theft of instructional materials or tests; access to, manipulation of, or tampering with laboratory equipment, experiments, or computer programs without proper authorization; alteration of grades or files; misuse of research data in reporting results; use of personal relationships to gain grades or favors; and any actions intended to gain academic advantage by fraudulent and/or deceptive means.

Student Responsibility
The student has full responsibility for the content and integrity of all academic work submitted. Ignorance of a rule does not constitute a basis for waiving the rule or the consequences of that rule. Students unclear about a specific situation should ask their instructors or academic staff, who will explain what is and is not acceptable in their classes or on campus.

Faculty, Staff, and Administrator Responsibility
Montana Tech Nursing Department

It is the shared responsibility of faculty, staff, and administrators to take reasonable precautions to prevent and discourage academic dishonesty. Additionally, it is a duty of faculty, staff, and administrators to report instances and charges of academic dishonesty to the Office of the Vice Chancellor for Academic Affairs through the Academic Dishonesty Violation online referral form.

Cheating
Cheating is defined as obtaining or attempting to obtain, or aiding another in obtaining or attempting to obtain credit for work or any improvement in evaluation of performance by any dishonest or deceptive means. Cheating includes, but is not limited to, the following.

Taking information:
1. Copying graded homework assignments from another student.
2. Working with others on a take-home test or homework (unless specifically accepted by the instructor).
3. Looking at another student’s paper or screen during an examination.
4. Looking at text, notes, or electronic devices (e.g., cell phones, tablets, smart pens, unauthorized calculators, etc.) during an examination (unless specifically accepted by the instructor).
5. Accessing another student’s electronic device (e.g., cell phone, tablet, laptop, desktop, etc.) and taking information from the device without consent.
6. Allowing another person to complete assignments or an on-line course.

Providing information:
1. Giving one’s work to another to be copied or used in an oral presentation.
2. Giving answers to another student during an examination or for a take-home test.
3. Informing a person in a later section about questions appearing on an exam after taking that exam.
4. Providing a term paper to another student.
5. Taking an exam, writing a paper, or creating a computer program for another student.

Plagiarism
Plagiarism is defined as submitting a term paper, essay, speech, laboratory report, or other assignment in which all or part of the words, ideas, or visuals are copied from the published or unpublished work of another individual without giving the original author proper credit for the words, ideas, or visuals. Such actions include, but are not limited to, the following.

Copying homework answers from a text to hand in for a grade.
Failing to give credit for ideas, statements, data, or conclusions derived by another author.
Failing to adequately summarize or paraphrase another’s work.
Failing to use quotation marks when quoting directly from another, whether it be a paragraph, a sentence, or a part thereof.

Submitting a paper purchased from a research or term paper service or downloaded from the internet.

Copying another student’s or a former student’s paper and handing it in as one’s own.

Giving a speech or oral presentation written by another and claiming it as one’s own work.

Presenting another’s computer program as one’s own.

Failing to acknowledge the source of copied or adapted visuals.

Other Forms of Academic Dishonesty

Other forms of academic dishonesty include any actions intended to gain academic advantage by fraudulent and/or deceptive means not addressed specifically in the definition of cheating and/or plagiarism. These actions may include, but are not limited to, the following.

1. Planning with one or more fellow students to commit any form of academic dishonesty together.

2. Giving a term paper, speech, or project to another student when one knows or reasonably suspects that student will plagiarize it.

3. Having another student take one’s exam, or complete one’s computer program or lab experiment.

4. Lying to an instructor to increase a grade or gain additional time to complete an assignment or exam.

5. Submitting substantially the same paper or speech for credit in two different courses without prior approval of the instructors involved.

6. Altering a graded work after it has been returned, then submitting the work for regrading, without the instructor’s prior approval.

7. Removing tests from a classroom without the approval of the instructor, or stealing tests.

8. Using a person’s signature without permission.

9. Offering, giving, receiving, or soliciting a bribe of money, materials, goods, services, or anything of value for the purpose of procuring or providing an academic advantage.

10. Forging documents or other data, or omitting facts which are material to the purpose for which the information is submitted to the University, potential employers, or community members.

11. Possession of unauthorized equipment or materials during a test, quiz, or similar, whether found accessing or not.
Montana Tech Nursing Department

Policy on Cheating, Plagiarism, and Other Forms of Academic Dishonesty

At faculty discretion, cheating may result in an F grade on the assignment or examination, or in the course. If a student does not accept the charge of cheating, s/he may bring the case to the Academic Standards Committee for review. Plagiarism may be considered a form of cheating and is, therefore, subject to the same consequences as cheating. However, as there may be plagiarism as a result of poor learning or inattention to format, and there may be no intent to deceive, some instructor discretion is appropriate. Under such circumstances, the instructor may elect to work with the student to correct the problem at an informal level. In any case that a penalty is applied, the student must be informed of the event being penalized and of the penalty.

The instructor shall contact the student with evidence of the academic dishonesty incident in writing within 10 business days of discovery of the event. The Academic Dishonesty Violation Referral form will also be submitted electronically to the Office of the Vice Chancellor for Academic Affairs. The instructor will show the student all evidence being considered and allow the student to fully respond. The instructor will notify the Vice Chancellor for Academic Affairs of the intended disciplinary action.

The Office of the Vice Chancellor for Academic Affairs shall determine if any further disciplinary action is required. In reported cases of repeated academic dishonesty, the Academic Standards Committee may be alerted and may apply additional penalties beyond those imposed by the individual instructors. Disciplinary actions might include, but are not limited to, reprimand; educational sanctions (completion of a report, paper, project, or workshop); loss of membership in organizations; or disciplinary probation, suspension, or expulsion from the University.

If the Office of the Vice Chancellor for Academic Affairs and/or the Academic Standards Committee determines that no violation has occurred, the instructor will comply with the decision, and refrain from issuing penalties, or remove those already on the student’s record.

Academic Progression
Montana Tech Nursing Department

Requirement for Progression

A grade of “C+” or higher is required for all nursing AND a “C” or higher is required for all non-nursing courses within the Nursing Program curriculum. After a student is accepted into the nursing program, courses can only be attempted once and must be passed with a grade of at least a “C+” for nursing courses and at least a “C” for non-nursing courses for the student to progress through the program. If any course grade is less than a “C+” (or a “C” for non-nursing courses) the student must withdraw from the Nursing Department. Petitions for re-entry into the program are considered on a case-by-case basis and all placements are dependent upon availability to the program.

Any student in the fourth semester who has failed a course must reapply, compete for selection, and re-take the TEAS exam.

All students enrolled in the BSN nursing program, are allowed to repeat only one nursing course throughout the curriculum. In the event the student fails a second course, the student must withdraw from the program.

Dosage Calculation

In order to continually assure a basic level of patient/client safety, nursing students are required to complete dosage calculations quizzes. Students must pass the quiz with 100% accuracy. If the student does not initially achieve 100%, the quiz can be retaken up to two more times. Students who fail to achieve 100% after three attempts are required to take a fourth exam composed of all new questions. In the event the student does not achieve 100% accuracy on the fourth exam, the student will fail the course. Dosage calculation competence must be demonstrated prior to the first clinical day for each course.

End of Program Assessment/Graduation Requirement

In addition to all other Montana Tech graduation requirements, BSN students must complete an end-of-program assessment/examination during their final semester of study. This assessment is a clinical requirement for NRSG 499 Leading and Managing: A Capstone Experience. The end-of-program assessment is the ATI RN Predictor exam and must be successfully completed with a 97% probability prior to the end of the semester. Students will receive and sign a contract outlining the requirements and the contract will be placed in the student’s file.

Neither a diploma, nor a transcript reflecting degree completion, will be issued until the student successfully completes the contractual agreement. Further exams will be at the student’s expense.

Clinical Performance

The goal of clinical experiences within Montana Tech’s Nursing Program is to provide the student with an opportunity to learn, gain experience, and improve nursing practice. The utmost goal, however, is to provide safe client care.
Montana Tech Nursing Department

The clinical faculty member has a legal duty to protect the client from unsafe nursing care provided by students. Therefore, students must continuously demonstrate appropriate clinical judgment and the ability to provide safe nursing care.

If student behavior, actual and/or potential, place a client in danger, or cause harm (or would harm a client without intervention on the part of the faculty member or facility staff), immediate action will occur.

Based on the severity of the incident, the student may be immediately removed from the clinical area. The clinical faculty member, in consultation with the Director of Nursing, may choose to allow the student to continue with clinical, or remove the student from clinical while the incident is investigated and resolved.
Montana Tech Nursing Department

III. EVALUATION OF STUDENT PERFORMANCE

PURPOSE

Montana Tech’s pre-licensure program prepares graduates for entry-level, safe and effective nursing practice. The nursing program uses tests, assignments, and clinical experiences to evaluate the student’s cognitive learning and clinical performance. A faculty or advisor may hold individual conferences with a student at any time to discuss student progress. The student may also request a meeting to discuss progress.

GRADING PHILOSOPHY AND FRAMEWORK

Montana Tech’s Nursing Department uses criterion-referenced grading in conjunction with mastery learning to evaluate academic progress within the program. This strategy combines objective measurement of student performance with multiple opportunities to demonstrate competence.

GRADED ACTIVITIES

Three types of graded activities are considered in the overall evaluation of student performance; tests, assignments, and clinical performance. A passing grade is defined as 78% (77.5%) for tests; Pass for assignments; and Pass for clinical performance.

Tests are graded using the following scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>92-100% (91.5-100%)</td>
</tr>
<tr>
<td>A-</td>
<td>90-91% (89.5-91.49%)</td>
</tr>
<tr>
<td>B+</td>
<td>87-89% (86.5-89.49%)</td>
</tr>
<tr>
<td>B</td>
<td>84-86% (83.5-86.49%)</td>
</tr>
<tr>
<td>B-</td>
<td>81-83% (80.5-83.49%)</td>
</tr>
<tr>
<td>C+</td>
<td>78-80% (77.5-80.49%)</td>
</tr>
<tr>
<td>D</td>
<td>70-77% (69.5-77.49%)</td>
</tr>
<tr>
<td>F</td>
<td>0-69% (0-69.49%)</td>
</tr>
</tbody>
</table>

CLINICAL ASSIGNMENTS

Clinical assignments are graded pass/fail. In the event of a failed clinical assignment the student will have one opportunity to resubmit the assignment.

ATI

- Assessment Technologies Institute® (ATI) offers resources designed to enhance student academic and NCLEX success.
- The comprehensive program offers multiple assessment and remediation activities. These include assessment indicators for academic success, critical thinking, and learning styles. Online tutorials, online practice testing and
Montana Tech Nursing Department

proctored testing over the major content areas in nursing are also available. These ATI tools, in combination with the nursing program content, assist students to prepare more efficiently, as well as increase confidence and familiarity with nursing content.

- Data from student testing and remediation can be used for program’s quality improvement and outcome evaluation.
- ATI information and orientation resources can be accessed from your student home page. **It is highly recommended that you spend time navigating these valuable orientation materials found on your ATI student home page.**

**Modular Study**

ATI provides review modules in all major content areas. Students are encouraged to use these modules to supplement course work. These may be assigned during the course and/or as part of active learning/remediation following assessments.

**Tutorials**

ATI offers many unique online tutorials. The tutorial Nurse Logic for instance teaches nursing students how to think like a nurse, how to take a nursing assessment and how to make sound clinical decisions. Learning System offers practice tests in specific nursing content areas that allow students to apply the valuable learning tools from Nurse Logic. Features embedded in the Learning System tutorial such as hint buttons, a talking glossary, and a critical thinking guide help students gain an understanding of the content. Other tutorials may be available and will be assigned as appropriate.

**Assessments**

Assessments will help the student to identify what they know as well as areas requiring active learning review. There are practice assessments available to the student and proctored assessments that are scheduled during courses.

**Active Learning/Remediation:**

Active Learning/Remediation is a process of reviewing content in an area that was not learned or not fully understood as demonstrated on an assessment. It is intended to help the student review important information to be successful in courses and on the NCLEX. The student’s test report called their individual performance profile will contain a listing of the topics to review. From their test results the student can remediate these topics to review by using a focused review which contains links to ATI review modules, media clips and active learning templates.

The instructor has online access to detailed information about the timing and duration of time spent in the assessment, focused reviews and tutorials by each student.
**Sample ATI Grading Rubric:**

<table>
<thead>
<tr>
<th>ATI Nurse Logic &amp; Learning Systems Tutorials completed per requirement</th>
<th>ATI practice assessment, Form A &amp; B completed per requirement</th>
<th>ATI proctored Test</th>
<th>Total possible (10 or 10% of course grade)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>Level 3</td>
<td>10 pts. (100%)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Level 2- Tier 1</td>
<td>9 pts. (90%)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Level 2- Tier 2</td>
<td>8 pts (80%)</td>
</tr>
<tr>

<tr>
<td></td>
<td></td>
<td>Below Level 1</td>
<td>0 pts.</td>
</tr>
</tbody>
</table>

*If a Level 2 is not achieved on the first attempt, 4 hours of remediation is required on the proctored exam before the student can retake the exam.*

- The student must achieve a Level 2 on the proctored ATI exam. If a Level 2 is not achieved on the first attempt 4 hours of remediation is required on the proctored exam before the retake. If after a second attempt a Level 2 is not achieved, the student will receive a failing grade for the course.

- The grade the student achieves on the first attempt is used to calculate the 10% for the grade.

**Assessments Technologies Institute**

Students are required to successfully complete program assessment tests, including an end-of-program assessment in order to progress through and graduate from the program.

The **MAXIMUM** amount of days allowed between retakes will be within one week for all courses.

**Test Attendance (Classroom)**

Students are required to complete tests at the scheduled times. In the event the student is unable to attend the scheduled test, the student must fill out an excused form. Within 24 hours (excluding weekends) the student will be notified if the test will be excused for another date and/or denied.

If a student cannot attend a scheduled test session due to illness, the student must contact the course instructor or Administrative Associate (496-4390) **PRIOR TO THE TEST**
Montana Tech Nursing Department

(within two hours of the start of the test). If the student is sick more than two school days and cannot take the test on the following day, they must have a note from their doctor.

If a student is late to attend a scheduled test session (arriving after the test has started) an automatic 10% will be deducted from the total score.

If a student fails to attend a scheduled test session without notifying the instructor and Administrative Associate, the student will receive a “0%” on the test with no opportunity to retake the test.

GENERAL REQUIREMENTS

At least one proctor will be present in the testing room during the entire test session.

No study aids (textbooks, notebooks, classroom notes, etc.) are allowed in the testing room during the test session.

No talking among students is permitted during the test session.

No papers, books, pens, pencils, purses, wallets, watches, beepers, cell/mobile phones, MP3 players, PDA’s, personal calculators or other electronic devices are allowed in the testing room during the test session.

Exception—Pencils, scratch paper, and a calculator are provided to each test taker. None of these items may be removed from the testing room.

“Kleenex”, cough drops and ear plugs will be supplied.

No cameras, photographic equipment or devices are allowed in the testing room during the test session.

Hats, scarves, hooded sweatshirts with pockets, and coats may not be worn in the testing room, unless religious practices require them.

Personal belongings must be left at the front of the room during the test session. Test proctors cannot be responsible for student valuables during the test session, so students should use discretion in bringing valuable items to the test.

Eating, drinking or use of tobacco is not allowed in the room during the test period.

No food, beverages or food/beverage containers are allowed in the testing room during the test session.

Once the test begins, students may not leave the testing room without the proctor’s permission. At the discretion of the proctor, the student may be accompanied by another proctor until s/he returns to the testing room.

Any student who engages in inappropriate behavior and/or does not heed the proctor’s warning to discontinue inappropriate behavior will be removed from the testing room and will receive a “0” score for the test. All of the following are considered to be inappropriate behavior:

Giving or receiving assistance of any kind.
Using any prohibited aids. Prohibited aids are any device or materials that would be helpful in taking the test.

Failing to follow the test regulations or the instructions of the proctor.

Creating a disturbance of any kind.

Copying, reconstructing or removing test items and/or responses (in any format) or notes about the test from the classroom or attempting to do the same.

During computerized testing, tampering with the operation of the computer or attempting to use it for any function other than taking the test.

**Day of the Test:** Please call 496-4390 if unable to complete a test at the scheduled time

a. Students should arrive prior to the scheduled testing time and wait at the door until the proctor indicates that students may enter the testing room.

b. If a student is late to attend a scheduled test session (arriving after the test has started) an automatic 10% will be deducted from your total score.

c. If a student fails to attend a scheduled test session without notifying the instructor and Administrative Associate, the student will receive a “0%” on the test with no opportunity to retake the test.

d. For paper-based tests, each student will be given a copy of the test, a “bubble sheet” answer form, and a #2 pencil with eraser. **Grades are determined on the answers marked on the bubble sheet only.** Any notations or answers marked on the paper-based tests are for your information and will not be used in calculation of a grade at any time. For computer-based tests, each student will be assigned to a computer by a proctor and must use that computer for the entire test session unless instructed otherwise by a proctor. Scratch paper and a calculator are available upon request. All test-related items must be returned to the proctor before leaving the room.

**During the Test Session**

Regular tests sessions are generally scheduled for one hour, 30 minutes, but the time allowed may be modified by a course instructor. Total testing time includes any period of time the student leaves the testing room. Final exams will be scheduled for two hours.

During the test session, if a student must leave the testing room for any reason prior to completion of the test, she/he will be required to give the incomplete test and any other testing-related items to a proctor before leaving. The proctor will give it back upon the student’s return. Absences from the room will be included in the total time allowed to complete the test. Except under extraordinary circumstances, only one student at a time is allowed to leave the testing room before completing the test.

Students who have questions or need to leave the testing room during the test session must raise their hand to be acknowledged by a proctor. When acknowledged, the student may come to the proctor desk. Only one student at a time is permitted to speak with the
proctor. Students SHOULD NOT leave their seat before being acknowledged by the proctor.

**After the Test Session**

Upon finishing the test, the student should bring all test materials to the proctor. The student should not leave the room until the proctor approves. Once a test is submitted, the student must leave the testing room.

Re-entry into the testing room is not permitted once the student’s test has been submitted to the proctor.

**Test Environment Modifications**

Students with disabilities who believe they may need accommodations in this class are encouraged to contact a Montana Tech Disability Services Coordinator (DSC) at either 496-4429 (North Campus) or 496-3730 (South Campus).

**Test Scoring, Grading, and Reporting**

Tests are scored using computer software. Raw scores are reviewed and modified as needed by faculty before grades are determined. This process is time and labor intensive, therefore test grades will be available as soon as possible.

Each student’s score (reported as a percentage) is posted on Moodle.

**Test Review**

After all students have completed the test, the faculty will provide time for students to review their tests. If a student misses a review, he or she can only review the exam if there is an excused absence. Students are given a maximum of 15 minutes to review any test. No notes may be taken during the review and all electronic devices must be removed from the student desks/tables. Tests for each course are only available for review until the next scheduled test. Final tests cannot be reviewed.

**Results Reporting**

Test scores are not released to students until the faculty person responsible for the test reviews results and makes any necessary adjustments.

Each student’s score (reported as a percentage) is posted on Moodle.

**IV. GENERAL POLICIES, REQUIREMENTS, AND INFORMATION**

**ATTENDANCE AND SCHEDULING**

Successful completion of the nursing curriculum requires regular class/lab/clinical/test session attendance. Children, family members, etc. are never allowed in the clinical area and are not allowed in the classroom. Most classes, laboratory and clinical experiences occur Monday through Friday; however, required clinical hours may also include a variety of day, evening, night and/or weekend shifts. The clinical experiences will occur in many different healthcare settings. Travel at the student’s expense will be required.
Montana Tech Nursing Department

Hours are subject to change depending upon clinical assignments, clinical availability and individual circumstances.

The course instructor may require attendance in the classroom phase of a particular course. Please refer to the individual course syllabus for course-specific requirements.

Classroom Attendance Policy

Attendance in lectures is essential to meet course objectives; therefore, prompt and regular attendance is required. Attendance requirements/hours for the lecture component of each course will be determined by individual faculty and defined in each course syllabus.

In the event the student fails to meet the attendance requirement for each course, a 2% deduction will be applied to the final grade of the course.

Clinical/Lab Attendance and Absence Policy

Attendance in the clinical/lab portion of class is essential to acquire experiences necessary to meet course objectives; therefore, prompt and regular attendance is required. Any period of time missed during a scheduled clinical/lab day will be considered a missed clinical/lab day (including arriving late, leaving early, or submitting late assignments. Regardless of any absence, coursework will need to be completed in order to meet the course objectives.

If a student’s clinical/lab absences exceed two days per semester, the student will be withdrawn from the program.

The student may be asked to leave clinical/lab if s/he:

Is not prepared (has not completed required readings, watched required media, required clinical forms, etc.)

Is not appropriately clothed/does not demonstrate professional appearance

Does not have the required clinical/lab supplies upon arrival to a clinical/lab assignment. This will be considered a missed clinical/lab day.

If a student fails to report to an assigned clinical/lab and does not notify the instructor or nursing department and/or the clinical facility/agency (if applicable), the student will be immediately dismissed from the nursing program.

APPEARANCE AND GROOMING STANDARDS FOR CLINICAL SETTING

Requirements for grooming and appearance in the clinical setting are based on safety, infection control, and the need to present a professional appearance. Whenever a student is in a clinical facility/agency, s/he must adhere to the following requirements:
Montana Tech Nursing Department Uniform

Students are required to wear designated clothing whenever they are in a clinical/lab setting. Uniforms are to be worn during clinical/lab experiences.

The required uniform consists of:

- Hunter Green uniform top with MT Tech Nursing Department logo
- MT Tech identification badge
- White, brown or black closed toed shoes (these shoes should be used exclusively for clinical)
- Black uniform pants

Each uniform top must have a Montana Tech Nursing Department logo embroidered on the upper left-hand side of the top. Nursing logos on uniform tops are embroidery by a vendor designated by the nursing department.

Clinical Attire—General Guidelines Regardless of Setting

An approved Montana Tech identification badge must be worn at all times. The badge contains the student’s first and last name and designation as a student nurse. The badge must be free of anything that covers the Montana Tech logo or student name/designation. The badge must be worn on the upper torso and be clearly visible at all times.

Expected personal hygiene includes clean skin, clean breath, and daily shampoo/bathing.

Fingernails should be clean, short, trimmed and filed. Artificial nails of any length are not allowed. Nail polish (if worn) must be pale-colored and completely cover the nail.

If hair is below shoulder length or hangs in the face upon bending, it should be pulled back off of the face. Facial hair should be neat and trimmed.

Perfume/cologne is not allowed. Personal care items such as deodorant/antiperspirant, lotion, etc. must not be excessively scented.

Extremes in make-up and/or hairstyle are not allowed.

Efforts must be made to assure that tattoos and other body modifications are not visible to patient’s/facility staff.

Wearing jewelry in the clinical setting is strongly discouraged. Only the following items are allowed:

- Earring(s)—limited to one post per ear lobe. No other visible items associated with piercing or body modification (including items worn in the tongue, nose, eyebrows, etc.) is allowed.
- 1-2 rings small enough to allow use of gloves with no risk of tearing the gloves will be allowed.

Clinical Attire—Patient/Non-Patient Care Settings

Student nurses should be visually distinguishable from regular facility staff; therefore, must wear the designated Montana Tech Nursing Department uniform.
Montana Tech Nursing Department

The uniform top/Montana Tech logo may not be covered with a lab coat, sweater, etc. Students who desire extra warmth may wear a white or black shirt underneath the uniform top.

Please refer to each clinical syllabus for any course-specific modifications to the required clinical attire.

Uniforms should be freshly laundered, pressed, and in good condition. Pants should be hemmed to an appropriate length. Shoes/shoelaces should be clean.

Shoelaces must be tied securely. No open toe shoes may be worn in the patient care area. Socks must be worn with clogs (i.e. “Crocs”). Clogs must have a heel strap or a deep heal cup.

Wearing a Montana Tech Nursing Department uniform, logo, identification badge, or clinically representing oneself as a Montana Tech student nurse in any way, is limited to activities directly related to nursing courses in which the student is currently enrolled.

BREAKS/TOBACCO USE DURING CLINICAL HOURS

Breaks during direct supervision clinical hours are at the discretion of the faculty person, but in general, students are not allowed to leave the immediate clinical area for a break.

Students should be prepared to be on a clinical unit for up to six hours before a meal break occurs. Light snacks and/or beverages may be consumed on the clinical unit, depending on facility policy and faculty choice, but students should eat breakfast before reporting for clinical. Lunch must be consumed on site.

The use of tobacco in any form (cigarettes, smokeless tobacco, etc.) inside, or in the vicinity of clinical facilities/agencies, public areas or on Montana Tech property is not allowed at any time. Tobacco users should consider the use of nicotine gum or patches if necessary.

CODE OF CONDUCT

While attending class, clinical, meetings or while on Montana Tech or clinical facility/agency property, student nurses, faculty, and staff are expected to continually conduct themselves in a manner that demonstrates professionalism, courtesy, tolerance, and respect.

BACKGROUND

Like all institutions of higher learning, Montana Tech of The University of Montana exists to advance knowledge, to promote inquiry and discovery, to develop students as responsible citizens, and to enhance the greater society. In addition, the Nursing Department strives to promote behaviors that model the caring nature of nursing practice. Reasoned discourse and respectful debate are means to resolve differences and to reach common understanding. Montana Tech also strives to provide a culture of civility where its members feel safe to express themselves free from discrimination, harassment, threats, and intimidation.
Montana Tech Nursing Department

The faculty in the Nursing Department have a professional and ethical responsibility to assist students to learn the skills necessary to become a professional nurse, including caring behaviors, and to provide a safe teaching and learning environment for students, faculty, and to patients who receive nursing care from students.

Faculty respect that students are learning, however students are expected to have adequate knowledge, skills, and judgment to practice safely in clinical situations. Student behaviors and/or performance should never present a danger (or reasonable assumption of danger) to any other person (including fellow students, faculty, campus staff, patients/clients, clinical facility/agency staff, etc.) or jeopardize the license of a faculty member or nurse working with the student.

OVERVIEW

- The Code of Conduct is derived from practice-based standards and codes such as:
  - American Nurses Association (ANA) Standards of Nursing Practice
  - State of Montana Statutes and Rules Relating to Nursing (Nurse Practice Act)

ANA Code of Ethics

- Montana Tech policies (please refer to Montana Tech Student Handbook and Catalog for details)

REQUIREMENTS

Student nurses are required to adhere to the Nursing Department Code of Conduct during their entire enrollment in the nursing program. Failure to adhere to the Code of Conduct will result in Corrective Action.

Unacceptable Behaviors

Students are expected to behave responsibly and do not have the right to engage in behaviors that may harm and endanger any other person (“any other person” is defined as fellow students, faculty, campus staff, patients/clients, clinical facility/agency staff, etc.). Unacceptable conduct includes any behavior, action, or verbalization that places any other in either physical or emotional jeopardy.

Physical jeopardy is the risk of causing physical harm. Emotional jeopardy means that the student creates an environment of anxiety or distress which puts any other person at risk for emotional or psychological harm.

Student behaviors and/or performance must be safe, ethical, and must not present a danger (or reasonable assumption of danger) to any other person or jeopardize the license of a faculty person or nurse working with the student.

Students who Pose Imminent Danger

If a student poses an imminent danger to self or others (act or direct threat of violence) while on campus, the emergency medical system (EMS) will be activated (911 will be called) and Campus Security will be called (496-4357). If a student poses an imminent
danger to self or others (act or direct threat of violence), while at a clinical site, the facility policy will be followed.

Examples of imminent danger include but are not limited to, verbal or physical threats to self and others, brandishing a weapon, repeated obscenities, or unreasonable interference with the learning or patient care environment.

**Code of Conduct Violations**

If a student demonstrates inability to adhere to the Code of Conduct, the faculty member making the allegation will meet with the student to discuss the situation as soon as reasonably possible. Corrective action may occur.

Based on the severity of the incident, the faculty member making the allegation (in consultation with the Director of Nursing) may choose to remove the student from class or clinical until the incident is resolved.

Based on the severity of the incident, a meeting to discuss the incident is held, using the format of the Montana Tech Nursing Department Appeals Process. A recommendation by the appeals committee will be forwarded to the Director of Nursing and Dean of Students. The student will be informally notified of the decision via e-mail and a formal letter will be mailed to the student’s mailing address of record.

For unsafe/unethical behavior, decisions/recommendations may include one or more of the following:

- Decision of no sanctions. Dismissal of the situation with a Corrective Action report being maintained in the student file until the student graduates from the nursing program.
- Decision to develop an Action Plan with the student.
- Recommendation for dismissal of the student from the nursing program.

**At-Risk Students**

At times, students demonstrate behaviors that do not fit clearly under the above categories (unsafe practice and/or code of conduct violations), yet the behaviors suggest that the student may be at-risk.

These behaviors include but are not limited to excessive absenteeism or absences without notice, a pattern of tardiness, late assignments with elaborate excuses for not meeting deadlines, deteriorating productivity, pervasive poor concentration, or difficulty making decisions, and forgetfulness. If faculty/staff observes these types of behaviors in students, the behaviors need to be addressed immediately. Faculty members are encouraged to meet with the student to discuss a course of action for student success.

If a student demonstrates at-risk behaviors, the faculty person will contact the Director of Nursing and Dean of Students. The faculty person having a concern for the student will hold a meeting with the student to discuss the situation as soon as reasonably possible.

Corrective action may occur. Faculty must notify the Director of Nursing if corrective action occurs. Based on the severity of the incident, the faculty member making the
allegation in consultation with the Director of Nursing may choose to remove the student from class or clinical while the incident is investigated.

Based on the severity of the incident/behavior, a meeting to discuss the incident/behavior is held, using the format of the Montana Tech Nursing Department Appeals Process.

A recommendation by the appeals committee will be forwarded to the Director of Nursing and Associate Vice Chancellor for Student Affairs/Dean of Students. The student will be informally notified of the decision via e-mail/telephone and a formal letter will be mailed to the student’s mailing address of record.

For at-risk student behavior, decisions/recommendations may include:

- Decision of no sanctions. Dismissal of the situation with a report being maintained in the student file until the student graduates from the nursing program.
- Decision to develop an Action Plan for the student.
- Recommendation for dismissal of the student from the nursing program.

COMMUNICATION

Student Expectation:

1. Students must use Montana Tech email for all official correspondence with the Nursing Department and Nursing Faculty. Outside vendors (like Gmail, Hotmail, Yahoo, etc.) could accidently be discarded by Tech IT security measures within the email system.
2. Students must check Montana Tech email at least three times weekly while enrolled in the Nursing Program. Although not required, it may benefit the student to check their Montana Tech email periodically during academic breaks.
3. Students must respond to any faculty or staff email or phone contact within two (2) business days (24 working hours) while classes are in session. If needing to communicate with faculty during academic breaks, contact the Nursing Department at 406-496-4390.
4. Students must utilize the proper channels when communicating a problem. If a problem arises, students must discuss the issue(s) with the involved faculty member first. If further discussion is needed, students must utilize the appeals process outlined elsewhere within this handbook.
5. Students must communicate with faculty, staff and other students in a respectful and professional manner, whether the communication is written, electronic, telephone or during person to person communication.
6. Students must update the Nursing Department within 14 days of any changes to name, address, and/or phone number. The contact information on file within the Nursing Department is the information that will be utilized in the event of urgent matters or in the event that email communication has failed.
Montana Tech Nursing Department

Faculty and Staff Expectations:

1. Faculty and staff will use Montana Tech email for all official correspondence with students regarding program business. In the event of urgent matters or in the event that email communication has failed, the Nursing faculty and staff will utilize the contact information found within the student’s file maintained in the Nursing Department.

2. Faculty and staff will check email at least once daily during business days while classes are in session. Faculty might check their email periodically during the academic breaks; however, this is not a requirement or expectation.

3. Faculty and staff will respond to email or phone contact from a student within two (2) business days (24 working hours) while classes are in session.

4. Faculty will expect that if communication with a student needs to happen during academic breaks, all communication will be coordinated through the Nursing Department.

5. Faculty will provide all Montana Tech communication information in their individual class syllabi. This information must include their Montana Tech email address, their Montana Tech office phone number and their available office hours.

6. Faculty members may choose to provide other contact information such as cell phone numbers. However, the inclusion of this information to the students is not a requirement. Should a faculty member choose to provide additional contact information, it is up to that individual faculty member to set guidelines for this form of communication.

Problem Resolution

If a student has an unresolved problem, or has questions or concerns about specific course or program requirements, the student is expected to follow the appropriate communication chain of command in an attempt to resolve the issue. In the event that the communication chain of command is not followed, unresolved problems will be directed back to the appropriate person for resolution. The appropriate chain of command within the Nursing Department is as follows:

Involved student, faculty, advisor, Director of Nursing, Dean of the College of Letters, Science & Professional Studies, Vice Chancellor of Academic Affairs/Research, Chancellor, Montana Office of the Commissioner of Higher Education, Montana Board of Regents of Higher Education.

Keys to a Successful Student Experience

1. Try to solve/resolve problems on your own first.

2. Inform the nursing faculty member/advisor of circumstances that may affect your academic/clinical performance before it becomes a problem.

3. Personal problems or conflicts between students need to be resolved outside of the classroom/clinical/lab setting. Students are encouraged to discuss these issues with a faculty member/advisor/campus counselor during office hours or by
Montana Tech Nursing Department

appointment. (Please refer to the Nursing Department Code of Conduct for detailed further information)

4. Keep personal information private—yours and anyone else’s. In accordance with FERPA guidelines, the nursing faculty will not violate student confidentiality (faculty and staff will not share details of individual student circumstances with other students).

5. Questions regarding assignments should be clarified at the time the assignment is made.

6. Keep your own record of your grades in individual courses. Utilize Oredigger Web to access registration, scheduling and grade information.

CONFIDENTIALITY

Patient and/or clinical facility/agency information can be used only for achievement of Montana Tech Nursing Department goals and objectives and must be held in strict confidence. Any other use or disclosure of a patient’s personal information and/or protected health information or confidential matters within a facility is in violation of Montana Tech policy, the Nurses Code of Ethics, the Nurse Practice Act, and State & Federal law.

Violation of patient privacy rights or revealing confidential information will result in immediate dismissal from the nursing program. The student will be held individually responsible for any criminal and/or civil judgments resulting from unauthorized disclosure of protected/confidential information.

Social Media-6 Tips to Avoid Problems:

1. Remember that standards of professionalism are the same online as in any other circumstance.

2. Do not share or post information or photos gained through their nurse-patient relationship.

3. Maintain professional boundaries in the use of electronic media. Online contact with patients blurs this boundary.

4. Do not make disparaging remarks about patients, employers, or co-workers, even if they are not identified.

5. Do not take photos or videos of patients on personal devices, including cell phones.

6. Promptly report a breach of confidentiality or privacy.

Montana Tech Nursing Department

Students will receive specific training regarding privacy and confidentiality, including all applicable requirements mandated by Montana law and the Federal Health Insurance Portability and Accountability Act (HIPAA).

Additionally, students who volunteer and are asked to participate in a Nursing Department Student Appeal are required to sign a confidentiality form. Disclosure of any information related to the appeals process will result in corrective action.

Corrective Action

If a nursing student fails to comply with the terms of the Nursing Student Handbook, s/he will be subject to corrective action, which may include, but not be limited to, corrective counseling, additional course work/clinical hours, and referral to the Associate Vice Chancellor/Dean of Students for further assessment, or dismissal from the nursing program.

EXPENSES

Completion of a degree in nursing is costly. In addition to tuition and fees, nursing students should be aware that required nursing textbooks/reference materials are expensive and that many courses require several texts. The student should also plan for a number of out-of-pocket expenses related to course/program requirements.

Program Fee

Once accepted into the nursing program pre-licensure students are assessed a program fee each semester ($600.00 per semester)

Graduation Pins

Montana Tech’s Nursing Department celebrates the graduation of its students each year with a traditional pinning ceremony. Each program has its own pin. Students are responsible for the cost of the pin.

Replacement Identification Badges

The Nursing Department issues one identification badge to each student free of charge. Students must wear this identification badge or a specific id at all times while in a clinical setting. No other identification badge can be worn.

Transportation

Students are responsible for their own transportation to and from classes and clinical experiences. Students should expect and be prepared for travel outside of the Butte area. No clinical hours are awarded for transportation to and from clinical sites or for clinical preparation.

Uniforms

The Montana Tech Nursing Department selects the style and type of clinical attire worn by its students and faculty in the lab/clinical setting. Students are required to wear designated clothing whenever they are in a clinical/lab setting. Students are encouraged
Montana Tech Nursing Department

to purchase at least two pairs of pants and two uniform tops to assure a clean uniform each clinical day.

Students may purchase shoes and pants wherever they desire, but **uniform tops and embroidery must be purchased from a vendor selected by the Nursing Department.** The vendor is on campus during the first week of each semester and sells all required clothing as well as clinical supplies.

**Injuries Sustained in a Clinical Area**

Any injury that occurs in a clinical setting (i.e., needle stick or other exposure to blood borne pathogens, back injury, injuries sustained during appropriate patient care, etc.) must be **immediately** reported to the clinical faculty.

The faculty will ensure that all facility policies relevant to the injury are followed. Additionally, students must also comply with Montana Tech’s unusual occurrence policies and procedures. Nursing Department personnel will assist the student in completion of required documentation.

All costs associated with injuries sustained in the clinical setting are the responsibility of the student.

**Insurance**

*Malpractice Insurance*

Malpractice insurance is required for all nursing students and is paid for by Montana Tech through student fees. Basic terms of the policy are:

Each student is covered only while supervised by a Nursing Department faculty member in an official Montana Tech nursing course. Coverage ceases upon termination of the student’s enrollment, either by graduation or withdrawal. Coverage is limited to activities that are part of, and a requirement of, the student’s curriculum.

Student malpractice insurance does not cover student employment.

It is the student’s responsibility to notify the clinical faculty member about any occurrence that might cause liability to the student, clinical affiliate, or Montana Tech. A facility/agency incident report must also be completed.

*Health Insurance*

The student is responsible for all expenses resulting from injuries that s/he experiences in the clinical setting. Personal health insurance is required as per Montana Tech policy.

**Initial Licensure**

Licensure of nurses is governed by individual state boards of nursing. Initial licensure for registered nurses is based on performance on the National Council of State Boards of Nursing’s (NCSBN), NCLEX-RN examination as well as other requirements. For general information about the NCLEX-RN examination, please refer to the NCSBN website (www.ncsbn.org). For Montana licensure, please refer to the Montana State Board of Nursing for information regarding licensing requirements [http://mt.gov/dli/bsd/license/bsd_boards/nur_board/board_page.asp](http://mt.gov/dli/bsd/license/bsd_boards/nur_board/board_page.asp).
Montana Tech Nursing Department

Special Requirements for Clinical Settings

Health/CPR

A variety of immunizations/proofs of freedom from infectious disease and CPR training are required for all health persons who care for patients/clients in a health care facility/agency. Students who apply for acceptance to the nursing program submit current, up-to-date paperwork for the following:

Students must have proof of Tdap within the last 10 years (Tetanus, Diphtheria, and Acellular Pertussis).

a. Proof of 2 shots of measles, mumps, and rubella vaccination or immunity
b. Proof of Varicella vaccination or immunity (two doses four weeks apart, or a positive titer).
c. Proof of annual (fall) Influenza vaccination.
d. Evidence of Hepatitis B vaccination (series of three shots) or seroimmunity (demonstrated with a positive titer). It is important to note that you need to allow at least 6 months to complete the series.
e. Current evidence of freedom from active tuberculosis (TB skin test or chest x-ray) annually.

Current completion of an approved CPR course, adult & infant (American Heart Association Health Care Provider or American Red Cross Professional Rescuer) during his or her entire enrollment in the nursing program.

Student Health

Any health condition that may affect the student’s ability to meet program/course objectives should be promptly reported to the Director of Nursing.

Student pregnancies should be promptly reported to the clinical faculty. The student will not be placed in clinical situations that might jeopardize the pregnancy.

Any student who has physical restrictions prescribed by a health care provider must provide a statement from the provider outlining the restrictions and/or limitations. The Director of Nursing and Associate Vice Chancellor/Dean of Students will determine if course objectives are achievable with reasonable accommodation.

During clinical experiences, students must report communicable infections, skin breaks, etc. to the clinical instructor prior to caring for patients/clients.

All information reported to the Nursing Department related to student health/medical conditions is held in strict confidence and shared only with individuals who have a legitimate right to the information.

Latex

Latex sensitivity is a concern in the laboratories and clinical settings. Montana Tech is unable to provide a latex-free environment. Although nitrile gloves are provided, the student may still be exposed to latex from lab specimens, equipment and models. It is important that the student fully understand the risks of repeated latex exposure. If you
have questions or concerns about exposure to latex, you should contact the Nursing Department.

Simulation Lab Policy

Purpose

The primary objective of the Simulation Lab is to promote a superior level of high fidelity learning/teaching for students and faculty by providing a state-of-the-art environment to evaluate basic and advance skills/behaviors.

Simulation-based education is increasingly viewed as a crucial part of healthcare training programs. The benefits of simulation training include practicing and making mistakes in a risk-free environment, identifying sources of error in care processes prior to their implementation in practice and adapting scenarios for learners at multiple levels. In our clinical simulation laboratory, students practice real skills in a simulated environment. Our most realistic use of simulation for learning is our high-fidelity mannequins for nursing care. These mannequins can breathe, speak, and be programmed to respond physiologically to students’ interventions during scenarios designed to mimic actual patient situations. The Simulation Lab provides a supportive environment for students to learn and master nursing skills.

Policies

Students should never discuss scenarios occurring in the simulation lab except in debriefing sessions. Telling another student, the details of a simulation exercise is considered a breach of the nursing department’s confidentiality and professionalism standard.

Unless otherwise instructed, students are to dress for simulation lab as if attending clinical. Uniforms, name badges and clinical supplies and equipment are required.

The simulation lab should remain locked at all times. Access to the lab is limited to nursing department faculty and staff.

Students are not allowed in the simulation lab unless a faculty member is present. This includes time before the clinical lab is scheduled to be and during breaks.

Standard Precautions are to be followed at all times as are all safety guidelines used in the clinical settings. Sharps and syringes are to be disposed of in appropriate containers.

Equipment may not be removed from the simulation lab for practice nor are the simulation labs to be used for practicing clinical skills unless supervised by faculty.

Students may be digitally recorded during scenarios. Viewing of videos recorded during training are only permitted with faculty members. The videos are the property of the nursing department and students may not possess simulation lab videos or recordings. All video recordings will be deleted at the end of the semester.

Electronic devices (cell phones, pagers, etc.) cannot be used in the simulation lab.
Montana Tech Nursing Department

After simulation, take your personal belongings with you (i.e. papers, pens, stethoscopes, pen light etc.).

Food/Drinks are not permitted in the simulation lab. Drinks must be covered and left on the table outside of the simulation lab.

Students who have a latex allergy must inform the clinical instructor prior to lab.

Absence from a schedule lab is considered a missed clinical day and students absent the day of simulation training may not be allowed to make up that training.

Background check

Clinical practice is a mandatory part of Montana Tech of the University of Montana Nursing Programs. To ensure the safety and well-being of all patients, many employing institutions in health care have increasingly stringent requirements and background checks as conditions for providing patient care by students. Therefore, it is required that all students within the nursing program complete an annual background check. Any fees or costs associated with background checks are the responsibility of the students.

The involved clinical affiliate receives and reviews the background check to determine if each student may complete clinical hours within the agency. Since clinical practice in actual (not simulated) health care settings is a mandatory component of Montana Tech’s nursing curriculum, students who are denied access to a clinical affiliate are unable to meet course and curriculum objectives and therefore are unable to progress through the program.

Any applicant convicted of a felony will not be admitted to the program.

If an enrolled student is convicted of a felony, the student will not be able to progress in the nursing program. Acceptance to and graduation from the Nursing Program does not assure eligibility to sit for the nursing licensing examination. The Montana Board of Nursing makes all final decisions on issuances of licenses.

Any additional requirements requested by the clinical affiliate, such as, drug screens or additional background checks will be at the student’s expense.

Student Representation

Students from each cohort will be selected by their peers to serve as student representatives for participation in program review and communication. Student representatives are expected to attend monthly Nursing Department faculty meeting to provide input and receive updated information. This process serves as a standing agenda item for two-way communication.

Use of Cellular Phones/Electronic Devices

Cellular phones/electronic devices should be turned off or silenced during class. “Texting” is not allowed during class.
Montana Tech Nursing Department

Use of cellular phones or other electronic communication devices is strictly prohibited in clinical areas/classrooms. Students are not allowed to take pictures with their cell phones when in the clinical setting.

Students who have a legitimate need for a cellular phone/electronic device should request permission for its use from the course/clinical instructor.

Use of Supplies

Only the course instructor or designee can distribute the equipment and lab supplies used by students to gain competence in clinical skills. Students are not allowed to enter Nursing Department supply rooms/areas for any reason.

Removal of any item from the Nursing Department, except as approved by the faculty, or a clinical affiliate, constitutes theft. Incidences of theft will be referred to law enforcement personnel and will result in corrective action.

Use of Regulated Medical Equipment

Montana Tech student nurses may only use regulated medical devices such as syringes, urinary catheters, IV catheters, blood glucose monitors, etc. under the supervision of a faculty person/designee.

Direct supervision is required any time a student uses a regulated medical device on another person. Practicing technique(s) on another person without faculty supervision, or any other unauthorized use of these devices, will result in corrective action.

Disabilities-

To progress successfully through the program, applicants should have

- Adequate visual acuity, with or without corrective lenses, to read fine print
- Adequate hearing ability, with or without auditory aids, to be able to hear heart, lung, bowel sounds, etc. and understand a normal speaking voice
- Adequate physical ability to perform basic client/patient care
- Sufficient command of the English language to effectively communicate (verbally and in written form) with clients/patients, families, and other healthcare professionals.

Students with disabilities who believe they may need accommodations in class are encouraged to contact a Montana Tech Disability Services Coordinator (DSC) at either 496-4429 (North Campus) or 496-3730 (Highlands College).

V. STUDENT APPEALS

The Nursing Department supports the due process from both a legal and ethical viewpoint. Any student who believes s/he has been treated unfairly to request a review of the circumstance through a formal Nursing Department appeal. Pursuit of due process cannot interfere with the rights of others.

Students may appeal decisions made by the Nursing Department or any individual Nursing Department faculty member or members.
**PURPOSE OF AN APPEAL**

a. To give students an opportunity to provide evidence that the faculty decision was incorrect.

b. To give students an opportunity to provide evidence such as records, documents, and testimony to support his/her claim.

**GENERAL APPEAL PROCESS**

The student must provide the Director of Nursing with written intent to file an appeal within one business day after the incident. The student should include any information s/he feels is relevant to the appeal in a formal letter. A dated, signed and scanned letter sent by email will be accepted.

The Director of Nursing convenes an appeals committee consisting of:

a. A Nursing Department faculty member not involved with the incident being appealed

b. A Montana Tech counselor

c. A neutral-party student—this student is selected by the Director of Nursing from a list of volunteers generated at the beginning of each semester. The neutral-party student cannot be enrolled in the same NRSG courses as the student requesting the appeal. They must sign a waiver indicating that there is no conflict of interest between the neutral-party student and the student requesting the appeal. They are also required to sign and abide by a confidentiality agreement.

**Process**

The Appeals Committee first meets with the involved faculty member (if applicable) followed by the student requesting the appeal.

The student presents any relevant information to the Appeals Committee. The student may have one student peer-advocate present, if desired.

The student peer-advocate (who must be currently attending Montana Tech) is chosen by the student and is required by the Nursing Department to sign a confidentiality form. The peer-advocate does not actively or verbally contribute to the appeal.

If the student desires anyone else’s presence during the appeal (i.e. a non-nursing faculty member, family member, attorney, etc.) written notification must be made to the Director of Nursing at least 24 hours prior to the Appeals Committee meeting. This person may not contribute actively or verbally during the appeal.

The appeals committee will then confer and forward a recommendation to the Director of Nursing. Following the appeal, the student must meet with their advisor to go over the committee’s decision. The student will also receive formal notification via a letter mailed to the student’s mailing address on record. The Director of Nursing can approve or deny the appeal recommendation.
Montana Tech Nursing Department

Appeal-Specific Requirements

Grade Appeal:
Written intent to appeal any nursing department grade must be given to the Director of Nursing within one business day of being informed of the grade being posted.

Appeal of Involuntary Dismissal from the Nursing Program Appeal:
Written intent to appeal an involuntary dismissal (i.e., Unsafe Clinical Practice or Code of Conduct violations) from the Nursing Program must be given to the Director of Nursing within one business day of notification of the involuntary dismissal.

Request to Re-Enroll in Nursing Courses
Students who received a failing grade in a nursing course and whose progression through the curriculum has been delayed may request to re-enroll in clinical courses for a future semester on a case-by-case basis. Students who wish to re-enroll should notify the Director of Nursing as soon as possible. Requests to re-enroll are dependent upon program capacity and sufficient financial, faculty, and clinical resources. Students may be required to complete remedial activities or consult with a health care provider prior to re-enrollment. Availability of seats will be determined at the end of each semester.

Request to Re-Enter the Nursing Program
Students who voluntarily withdrew or were involuntarily dismissed from the nursing program and wish to re-enter should notify the Director of Nursing in writing as soon as possible. Petition for re-entry into the program is considered on a case-by-case basis and is dependent upon program capacity and sufficient financial, faculty, and clinical resources. Students may be required to complete remedial activities or consult with a health care provider prior to re-entry and students who withdrew for medical reasons may be required to submit a “release to return” from a health care provider.
I have read, understand, and have had the opportunity to ask questions about the policies, requirements and information set forth in the current Nursing Department Student Handbook and agree to abide by them. I have been given a copy of the Handbook.

I acknowledge that failure to abide by these policies and requirements will result in corrective action.
