Sr. Extraction Engineer

Manage projects up to several million dollars in size
- Insure that company protocols are followed for all projects.
- Maintain company quality standards on all projects.
- Provide technical guidance and day-to-day management for the project.
  - Develop the technical program to generate the data required by the client to meet the project goals.
  - Schedule the personnel, equipment and space necessary to perform the technical program.
  - Work with the personnel performing the technical program throughout the project to insure that the work is being performed correctly and the necessary data are being collected.
  - Review the experimental results as they become available and interpret the results with respect to the overall project goals.
- Keep the project on schedule and on budget.
- Interface with the client, reporting data, schedule and budget information on a regular basis.

Write proposals for potential projects
- Work with the client to develop the project goals and the scope of the work to achieve those goals.
- Provide technical input to the proposed technical program.
- Estimate the costs and schedule for the project.

Write technical reports providing the results of the project, including:
- Experimental procedures and results.
- Interpretation of the results with respect to the client’s project goals.

Requirements
- Degree in Chemical Engineering, Extractive Metallurgy, or related field.
- Ideally these engineers will have a minimum of 5 years industry experience after College and/or a PhD or Masters. This work is in support of R&D and this candidate must have experience in at least one of the following fields:
  - Mineral processing, including gravity separation, magnetic separation and flotation
  - Thermal processing
  - Hydrometallurgy
  - Coal Cleaning and upgrading

IF YOU KNOW ANYONE with this kind of experience who you think may be interested in learning more about these exceptional career opportunities, please pass this e-mail on to them. If you are interested in learning more please send me your resume and I will contact you.

Thank you for your time and consideration.
