INTRODUCTION

This annual survey is conducted for the purpose of facilitating the career decisions of currently enrolled and prospective students. The survey is done in compliance with the Title IV Higher Education Reauthorization Amendments of 1986 (Sections 485 and 486). It is also completed as part of our continued effort to increase and expand our institutional effectiveness.

The Graduate Survey has two parts: (1) Bachelor’s and Master’s highlights and statistics, and (2) Certificate Programs and Associate of Applied Science Degrees (College of Technology) highlights and statistics. The portion of the summaries which deal with placement status accounts for all degree and certificate recipients, including U.S. Citizens and International graduates, are divided into the following six categories:

1) DEGREE-RELATED EMPLOYMENT
2) PROFESSIONAL EMPLOYMENT (Positions requiring college degree)
3) EMPLOYMENT OUTSIDE OF DEGREE AREA
4) CONTINUING EDUCATION
5) MILITARY
6) NOT CURRENTLY SEEKING EMPLOYMENT

Placement data are based on responses received from the graduates who participated in the Montana Tech 2001 Graduate Survey. A small portion of the survey was provided by secondary sources. A conscientious effort has been made to ensure the accuracy of the career information included in this report.

Because of the cyclical nature of the businesses and industries for which Montana Tech trains its students, placement statistics from any one year should not be viewed as representative long-term permanent results. The annual graduate survey should, instead, be viewed only as an informational resource in the career-planning process.
