

INTERDISCIPLINARY ARTS AND SCIENCES, B.S.

The Interdisciplinary Arts and Sciences (IAS) program provides a flexible education that combines different fields of study. You'll get a well-rounded and versatile degree that prepares you for a variety of career paths.

When you earn a bachelor's degree in IAS, you will benefit from:

- **A broad range of electives** that let you explore your interests across different disciplines.
- **Structured career support**, including personalized guidance for career planning and assistance with job or graduate school placement.
- **Personalized advising** from an experienced faculty member who will help you throughout your academic journey.

The **IAS core curriculum** is designed to build essential skills like written and oral communication, quantitative and scientific analysis, critical thinking, and ethical problem-solving. Through the **IAS concentration**, you'll learn to approach and solve complex problems by integrating knowledge and perspectives from multiple disciplines.

APPLYING IS EASY AND FREE.

Montana residents can apply for free at applymontana.mus.edu.

Nonresidents can apply for free at mtech.edu/applynow.

I chose Montana Tech because I wanted a school that felt real—where I could grow, be challenged, and still feel supported. The IAS Department gave me space to find my voice, and focusing on healthcare communication helped me realize my passion for connecting people with the care and information they need. My goal is to make a difference by helping patients and their families feel seen, heard, and understood.

- Anthony Ray, B.S. Interdisciplinary Arts and Sciences, '25

CAREER PATHS

A bachelor's degree in Interdisciplinary Arts and Sciences will prepare you for a career in every industry including government, advertising, healthcare, consultancy, social work, journalism, and more. Graduates also use their degree in IAS to prepare for graduate school in areas such as business, education, law, history, and psychology.

WHERE DO OUR GRADUATES GO?

WHY STUDY IAS AT MONTANA TECH?

At Montana Tech, students often collaborate with faculty on research projects in areas such as archeological and medical research, online social interactions and genetic influences to behavior. Recent graduates work in fields as exciting and varied as addiction counseling to career placement organizations and state government positions.

HANDS-ON LEARNING

- Hands-on experiences through course projects and research opportunities
- One-on-one interactions with faculty who offer mentorship from class to career
- Preparation for in-demand careers in industry including in government, advertising, consultancy, social work, journalism, and more, or placement in graduate programs such as law, psychology, and sociology, to name a few
