

CONSTRUCTION TECHNOLOGY, A.A.S.

Ready to start a career in a high-demand field? Our Construction Technology program provides you with the skills to succeed in residential and commercial construction.

This program is a complete learning experience. You won't just study construction; you'll build an entire 1,400-square-foot, 3-bedroom, 2-bath home from start to finish. You'll gain practical, hands-on experience in every aspect of the build, from the foundation to the final interior touches.

In the classroom, you'll learn to read and interpret blueprints, use handbooks and spreadsheets to estimate materials, and apply your knowledge of prevailing wage tables. The curriculum progresses from basic skills like floor and wall framing to more advanced exterior and interior finishing. We also reinforce crucial skills like writing, math, and communication, so you can confidently lead a team and excel in the construction trades.

APPLYING IS EASY AND FREE.

Montana residents can apply for free at applymontana.mus.edu.

Nonresidents can apply for free at mtech.edu/applynow.

PLAN YOUR NEXT ADVENTURE.

We offer personalized campus visits most weekdays. We're confident you'll love visiting our Highlands College campus in Butte, Montana, which offers scenic views with its close proximity to mountainous areas. The college is situated near the Highland Mountains, which provide a beautiful backdrop. Its proximity to the Northern Rockies and other national parks also contributes to the surrounding natural beauty. To prove it, we're offering a complimentary one-night hotel stay to all visitors traveling 100 miles or more! Learn more about availability and schedule your visit at mtech.edu/visit.

We go through two management classes, estimating, blueprint reading. The instructors teach us everything here, so you're pretty much set up right out of the gate to know everything on the job site. When you first walk in, they start off with a tape measure test, and the bare basics and then bring you all the way up to speed.

- Zachary Young, Construction Technology-Carpentry '24
