

# CONSTRUCTION MANAGEMENT

Lance College of Mines and Engineering

## NEW CONSTRUCTION MANAGEMENT PROGRAM AT MONTANA TECH

Construction management is defined as a professional service that uses specialized project management techniques to oversee a project's design, planning, and construction from beginning to end. A construction manager provides a project's owner(s) with effective management of the project's schedule, cost, quality, safety, scope, and function. U.S. News ranks construction managers #1 in Best Construction Jobs with a medium salary of \$98,890.

Montana Tech construction management students learn construction materials, construction safety, contract laws, fire protection, project estimation, cost management, BIM, and other computer modeling techniques. Many Montana Tech students receive scholarships, and out-of-state residents may qualify for our low Western Undergraduate Exchange (WUE)/Advantage tuition rates. Make your dream of becoming a construction manager a reality by contacting one of our admission representatives today or filling out our free online application.

Starting in the Fall of 2024, Montana Tech will offer a **Sprint Degree** pathway for incoming construction management students with some AP and/or dual-enrollment college credits. A student on the Sprint Degree pathway can finish the degree in as few as three academic years. Our advising counselors will determine your eligibility and additional scholarships based on your application.
